Also.....Hearth Slabs, Landscape Rocks, Stone.

STONE SUPPLY

When doing your sales please stay in touch with us to see what stone we have on hand and what stone we can reasonably produce to meet your needs in the time frame you require. We will do our best, but it is always better to even turn down an order if there may be difficulty with supplying it, rather than have a customer upset with us.Because we can't work most of the quarries in winter, we stock extra stone, but we quarry so many colors and textures of stone we cannot stock a lot of every type. .If you are going to need large amounts of stone, it is best to contact us in advance so we can be prepared. We will always do our best to supply what you need, or a suitable substitute.

Get your orders in early as it will be first come first served basis.

STONE MASONRY TRAINING SCHOOL

One of the most unique services we now offer is...

STONE MASONRY TRAINING. We have a private training school, where people with little or no knowledge of stone masonry can learn to do stone-work to work for others, or start and operate their own small business. "How to get sales etc." is part of the training, so they may use that skill to get you new customers if you hire them.

.....Even people who already have their own stonemasonry business may want to take a holiday and learn new techniques to expand their business, such as stone murals. Or they may prefer to send employees, or potential employees for these unique crash courses.

We can't teach everything about stone masonry in such a short course, but it is certainly enough to be the stepping stone to an exciting and prosperous career. Those that take our course learn how to be both good employers and good employees so this could be a good place to call when you are looking for stone masons for hire. There are some people that have already taken our course who would like to work as apprentices in order to get more practice.

Our specialty is STONE MURALS, but we also teach the easier styles of stonework, like facing stone, dry pac, random ashlar and landscaping for smaller projects the average home owner can afford. And even water features! These new budding stone masons could end up being your new employees, as some would prefer working for someone else rather than starting their own small business. How about your company offering a to sponsor a person wanting to learn to be a stone mason?..... see

www.naturalstonesite.com

Would you please put the following poster up where people will see it?

.....Thanks....Iris

Please make copies of this poster to post and distribute. Thanks..... from Iris
